**March 11, 2009: Basic First Aid**

Summary: Gary Johnson, Fire Chief of the Marysville Fire Dept, covered the important aspects of any first aid program. For those who have been trained to provide first aid, the first step is always to make sure the scene is safe. The next step is to either call 9-1-1 or ask someone else not trained in first aid to do so. This allows you to start assessing the victim immediately. Following the ABCDE can help the rescuer remember what to check for:

- A = Airway. Tilt the head back to allow the airway to open.
- B = Breathing. Put your ear next to the victim's nose and mouth to listen/feel for breathing.
- C = Circulation. Check the victims pulse for 5-10 seconds. If no pulse, start CPR (if trained).
- D = Disability. Assess for any mental/physical compromises that may have disabled the victim.
- E = Evaluation. Start an evaluation from head-to-toe to see what injuries have occurred.

If you wish to receive first aid or CPR training, contact the Marysville Red Cross at 937-642-6651.

## QUOTE OF THE MONTH - April Fools!

"It is the ability to take a joke, not the ability to make one up, that proves you really have a sense of humor."
